OBJECTIVE

Backend-focused Computer Science student with experience building production-grade Django applications using PostgreSQL, Docker, AWS, and CI/CD pipelines. Passionate about scalable backend systems, cloud technologies, AI-powered applications, and software engineering.

EDUCATION

Kalasalingam Academy of Research and Education

Madurai

B.Tech in Computer Science with AIML Specialization (CGPA: 8.2)

2023 - 2027

Kendriya Vidyalaya Uppal No.1

Hyderabad

Computer Science, Higher Secondary Education (CBSE)

2021 - 2023

SKILLS

Technical Skills

Programming: Python (Django framework), Java, C, Flutter (Dart)
ReactJS, Firebase, PostgreSQL/MySQL, GCP and AWS, Git, Figma, HTML, CSS, Arduino
AI tools: Antigravity, Cursor AI, Gemini API, Jupyter Notebook, Openspecs, OpenAI Codex

Language

English, Hindi, Tamil

EXPERIENCE

Backend Developer Intern

Dec 2025 - Present

Ayantrik Tech Private Limited- [view website](#)

Developing RESTful APIs using Django, PostgreSQL, and Postman for API development and testing - Containerizing applications using Docker and deploying on AWS - Configuring Bitbucket Pipelines for automated build and deployment - Optimizing database queries and maintaining production backend services - Leveraged AI-assisted development tools including Cursor and Antigravity to accelerate implementation, debugging, code reviews, and documentation while maintaining production-quality code.

Technical Head

Aug 2025 - Jul 2026

GFG Campus Body KARE

Led the development of registration and landing websites for coding events.

PROJECTS

CNN Model for animal classification: Built a TensorFlow-Keras CNN with data augmentation for accurate image classification. ([GitHub repo](#))

Registration Portal: Registration Portal: Built a MERN-stack hackathon portal with real-time validation, secure payments (Multer + Cloudinary), and a responsive React UI. ([Live Demo](#))

Expense Tracker: A simple multi-user web app for daily spending. Users can login via Google or email, with data managed through Supabase. Developed using Javascript and GCP. ([GitHub repo](#))

Attendance App: A Tkinter-based Python app for attendance tracking using CSV operations. ([GitHub repo](#))

AI Calculator (Gemini-API): Developed an AI-powered calculator app in **Flutter** integrating Google Gemini API (gemini-2.5-flash) to evaluate both typed and handwritten mathematical expressions with real-time drawing

CERTIFICATES

Udemy Python Bootcamp - Jupyter Notebook, OOPS, Decorators, GUIs and Flask framework. - [Certificate](#)

EXTRA-CURRICULAR ACTIVITIES

- Piano, music production (FL Studio) and scripting commercials for brands.
